Classic Server

- [Fallback Server](#)

Fallback Server

The main classic server was notoriously unstable during it's early days, frequently crashing when _andy and _specialk were not around to restart it. In order for himself an other players to get their Minecraft fix, fatso12321 created a backup known as Classic Fallback. Petroliam helped run the server alongside fatso12321 as Senior Operator when the majority of the player base moved to survival multiplayer in 2011
