

Fallback Server

The main classic server was notoriously unstable during its early days, frequently crashing when _andy and _specialk were not around to restart it. In order for himself and other players to get their Minecraft fix, fatso12321 [created](#) a backup known as Classic Fallback. Petroliam helped run the server alongside fatso12321 as Senior Operator when the majority of the player base moved to survival multiplayer in 2011
