# Map Archive

A collection of maps that are no longer in-use on our server

These maps are made available as a courtesy to players who have spent countless hours building and contributing to the community's Minecraft maps. However, misuse of the maps may result in termination of this service.

**Feel free to download and play these locally, however, upload and redistribution of our maps is strictly prohibited. All maps remain the property of Project City Build**

The primary link is a direct download, mirrors are from Google Drive or Mega. Note that Mega has a daily download cap which is smaller than some maps (which means you may need to either, split the download over 2 days, or sign up for a Mega account).

Extra information (e.g. town coordinates) is available for some maps

Unfortunately the 1.9 Survival download is missing significant amounts of the world.
